

TO: FCC

I believe NAB's petition to stop XM radio from broadcasting instant traffic and weather is wrong. I really resent the fact that NAB is trying to dictate policy for XM radio. XM radio is light years ahead of AM/FM, I listen to XM radio all day, it has 100 crystal clear channels and an unsurpassed variety of music, news, sports, and talk radio. Free Enterprise is about doing something better like XM radio did, not squelching progress.
